Subject: Comments On Invenergy Allegheny Energy Center

I'm finalizing my modeling comments to the Invenergy plan approval. I spoke with the folks from Allegheny County about this last week. The public comment period closes on June 8th and I'd like to get my final comments to the Permitting group by early next week at the latest. I don't think there are any show stoppers from my side but I did find a minor issue with the aux boiler PM emission rate that ACHD will have to "fix" (by lowering the final emission rate).

Just need to know if you will be able to review it (possibly Thursday) or if you'll need to look at it next week Ex. 6 Personal Privacy (PP) and I'll be in the office concentrating on cleaning my cube out. I have not heard back from Allegheny County regarding some questions I had last week (that Jason may have to answer and he may be on vacation) or anything from Riley who is also reviewing the permit. I'm hoping they don't respond later in the week. Under these circumstance, let me know if you think it would be prudent to wait until Tuesday to let you review this if you have time. I have 8 comments, 16 pages FYI.
